Change Eye Direction in Any Photo with nana img AI Eye Direction Changer

nana img AI analyzes your portrait and redirects the gaze within the original eye socket — no face swap, no warping, no artificial replacement. Upload any photo from your phone or camera, tell the AI where you want the eyes to look (face the lens, look left, look right, look up, or open closed eyes), and the model rotates the iris and pupil while keeping your natural skin texture, eyelid shape, brow position, and ambient lighting perfectly intact. Unlike other tools that paste generic eyeballs or introduce artifacts, this eye direction changer online free delivers results that look like they were captured that way in camera. No sliders, no manual selection — just upload, describe, and download in one pass.

Change the eye direction in this photo naturally using the eye direction changer. Shift the gaze
